Morrill & Janes Bank
1871 • FIRST KANSAS STATE CHARTER

Yesterday, Today and Tomorrow... Your Bank for Life.

Customer PC Requirements

The personal computer, to which Morrill & Janes Bank will install the Remote Deposit application and scanner, must meet the following requirements before the service can be installed. If your computer system does not contain these required components, the bank will not be able to successfully setup this new service.

Customer Name:	
Checklist Completed by:	
Date:	

Your computer must have one of the following operating systems installed:

	Operating System	Description
☐	Windows XP (Professional or Home Edition) Windows Vista Windows 7 Windows 8	XP (With Service Pack 2 or higher)

Your computer must have the following software already installed:

	Software	Description
☐	Internet Explorer 9.0 up to 10.0 (may have to use compatibility view settings)	Components of Internet Explorer are used within the Remote Deposit service.
☐	If Internet Explorer is 64 Bit this may be an issue and will need to be addressed we recommend 32 Bit	
☐	High Speed Internet Connection	

Your computer must meet the following hardware requirements:

	Hardware	Description
☐	2 GHz or higher speed processor	
☐	1 GB of RAM	2 GB or higher recommended for performance
☐	Available USB 2.0 Port	USB Hubs are not adequate and cannot be used to substitute for an available port.

These are our recommended requirements for proper installation and operation of the Remote Deposit Service. If the system you plan to use for the Remote Deposit Service does not meet these minimum requirements we cannot guarantee that the remote deposit service can be installed or, if it can be installed, that it will work properly. If your system does not meet these requirements and you experience service issues, we will recommend that you upgrade your system or we will have to un-install the service.
